Location: Chicago, IL

SUMMARY OF QUALIFICATIONS

Dynamic Full-Stack Developer and AWS Cloud Engineer with over 5+ years of cloud engineering experience. Proven ability to design, deploy, and manage scalable, secure, and cost-effective cloud solutions. Skilled in full-stack development, CI/CD pipelines, and infrastructure automation using tools like Terraform and AWS services. Passionate about creating efficient systems and delivering innovative solutions.

TECHNICAL EXPERTISE

Cloud Platforms	AWS, Google Cloud, Azure
Infrastructure as Code	Terraform, CloudFormation, Kubernetes
Scripting Languages	Python, Bash
CI/CD Tools	Jenkins, GitLab CI, AWS CodePipeline
Monitoring Tools	AWS CloudWatch, AWS CloudTrail
Version Control	Git
Web Development	HTML, CSS, JavaScript, Python (Django, Flask)
Operating Systems	Windows, Windows Server, Unix, Linux, Android, Chrome OS, VMWare, VirtualBox
Networking	Design, configuration, and troubleshooting of LAN, WAN, Cloud, and Wireless systems
Programming Languages	Java, JavaScript Python, SQL
Development Management Tools	Git, GitHub, Microsoft Project
Content Creation Tools	Adobe Photoshop, Adobe Illustrator, Microsoft Office
Hardware/Systems	PC, Mac, Cloud Virtualization, Networking appliances (Cisco), VPN

WORK EXPERIENCE:

Full Stack Developer

Freelance | January 2019 - November 2022

- Built responsive, dynamic websites using HTML, CSS, JavaScript, and Python frameworks.
- Created RESTful APIs and integrated third-party APIs to enhance application functionality.
- Developed and deployed scalable web applications on AWS and Google Cloud platforms.
- Implemented authentication systems and data storage solutions using RDS and DynamoDB.
- Conducted code reviews and optimized application performance.

Java Developer

Techstand LLC | February 2025 - February-2026

- Develop and maintain Java-based backend applications.
- Build REST APIs using Spring Boot.
- Integrate databases and optimize SQL queries.
- Perform testing, debugging, and code reviews.
- Deploy applications using CI/CD pipelines and cloud platforms.

Cloud DevOps Engineer

Rice.F.W. W Tech | March -2026- Present

- **AWS Resource Management:** Managed and monitored AWS resources such as EC2 instances, S3 buckets, and RDS databases, ensuring high availability and performance.
 - **Security Best Practices:** Implemented IAM roles, security groups, and VPC configurations.
 - **Auto-Scaling:** Configured and managed auto-scaling groups for EC2 instances.
 - **Backup and Recovery:** Performed routine backup and recovery operations using AWS Backup and other native tools.
 - **Automation and Scripting:** Developed scripts using AWS CLI, SDKs, Terraform, and CloudFormation for automating routine tasks and infrastructure deployment.
 - **Serverless Workflows:** Developed Lambda functions and implemented AWS Step Functions for event-driven automation.
 - **Monitoring and Logging:** Set up AWS CloudWatch, AWS CloudTrail, and third-party tools for monitoring and logging, including configuring CloudWatch Alarms for proactive issue detection.
 - **Cost Management:** Monitored AWS costs, identified cost-saving strategies, and created detailed cost reports and dashboards using AWS Cost Explorer.
 - **Documentation:** Maintained comprehensive documentation for AWS infrastructure and processes.
 - **Infrastructure Management:**
Designed, deployed, and maintained cloud infrastructure on AWS, Azure, and Google Cloud.
Managed virtual networks, storage accounts, and other cloud services.
 - **Automation and CI/CD**
Developed and maintained CI/CD pipelines using Jenkins, GitLab CI, and AWS CodePipeline.
Automated deployment and configuration processes.
-

ACADEMIC PROJECTS:

- **Software Gaming Project:** Developed a gaming project focused on quick IQ development for K-12 students.
 - Developed a library directory using SQL.
 - **Full Stack Development:** Created multiple websites using HTML, CSS, JavaScript, and Python.
 - Automated the deployment of multi-tier applications on AWS using Terraform.
 - Designed an orchestration pipeline integrating Jenkins, GitLab, and AWS CodePipeline.
 - Built a full-stack e-commerce platform using React for the frontend and Django for the backend.
 - Deployed the application on AWS EC2 instances with auto-scaling and load balancing.
-

EDUCATION

Master of Science in Enterprises and Cloud Computing

Lewis University, Romeoville, IL

December 2024 | GPA: 3.6/4.0

Major: Network Enterprises and Cloud Computing

Bachelor of Engineering (B.E)

Osmania University, India

September 2020 | GPA: 75%

Major: Electrical & Electronics Engineering

Minor: IoT

CERTIFICATIONS:

- **HTML, CSS, JavaScript:** 6-month training program
 - **Python:** 3-month training and hands-on project
 - **Cloud Service Providers:** Training and projects
 - **Industrial Automation:** 6-month training with real-time projects
 - **Electrical Core Designing:** 6-month training with project design
 - **Solar Panel Installation:** 6-month practical field training
 - **Basic Electrical and Electronics:** Training from ATI-EPI
 - **SIEMENS LOGO:** Industrial project development training
 - **Power Electronics Devices and Applications:** Training
 - **QUADCOPTER:** Training from VIT
 - **Industrial Maintenance and Electrical Safety:** Training from NSTI
-

HONORS, ACTIVITIES, AND VOLUNTEER EXPERIENCE:

- Awarded for Technical Excellence for a major project in the final year.
- Academic excellence is awarded every semester.
- Participated in technical and development programs, including PCB fabrication, debugging the circuit, Smart Energy Management Solutions, and electric vehicles.

- Involved in volunteer activities and professional associations.

LANGUAGE SKILLS:
Fluent in English
